

Background

Ph.D.@Chinese University of Hong Kong (CUHK) | NSFC Student Research Program 2023.8 – 2026.7
M.Phil.&B.Eng.@Xiamen University (XMU) | National Scholar.; Presidential Scholarship 2015.9 – 2022.6

I work on **Agents**, specially for:

- (i) CLI Agents for Digital Automation: [General CLI Agent \(Seed2.0\)](#); [Visual Coding \(Seed1.8\)](#); [Claw-Eval \(Live\)](#); [GameCrafter-Bench](#); [PhoneBuddy Series](#); [IR3D-Bench](#); [PSAgent](#).
- (ii) Auto AI Self-improvement: [Auto R&D Agent \(“Seed-for-Seed” prototype in Seed2.1\)](#); [On-Policy Data Evolution](#).

[Intern@Meta Superintelligence Lab \(MSL\)](#), [ByteDance Seed](#), [Tencent Hunyuan](#); [Co-founded ScholaGO startup](#) for Agents x K12 education in 2024; [Won PaperDigest Most Influential Paper@AAAI’25](#).

Selected Experience

[Ex5] [Meta Superintelligence Lab \(MSL\)](#), CA, US, Research Scientist Intern 2026

- [Search-Enhanced Code Agent Post-Training](#): trained code agents for search-heavy software workflows, improving web/codebase search, evidence grounding, and retrieved-context code changes.
- [Search Trace Evaluation](#): built web/codebase search traces with evidence checks and retrieved-context use; improved BrowseComp-style evaluations by 2.8pp.

[Ex4] [Tencent Hunyuan, Agent Team](#), CN, Research Scientist Intern 2026

- [PhoneBuddy Series](#): built a mixed CLI&GUI phone-agent harness ([PhoneHarness](#)), studied [PhoneWorld](#) auto-synthesis, trained open [PhoneBuddy](#), and built [PhonePrivacy](#) / [PhoneSafety](#) evaluations.
- [Claw-Eval \(Live\)](#): built a workflow benchmark; used rollouts and verifier feedback for agent mid-training.

[Ex3] [ByteDance Seed, VLM Agent Team](#), CN, Research Scientist Intern 2025

- [General CLI Agent \(Seed2.0\)](#): built Coco CLI harnesses, trajectory/evaluation pipelines, and verifiers for general CLI-agent training and evaluation; improved TB2.0 cross-harness stability by 3pp.
- [Auto R&D Agent \(“Seed-for-Seed” prototype in Seed2.1\)](#): built MCP/CLI AI-for-AI workflows connecting data, training, and evaluation loops for "Seed-for-Seed".
- [Visual Coding \(Seed1.8\)](#): improved trajectory quality/quantity and RL visual rubrics; improved chart-to-code visual quality by 6pp.
- [Tool-Use Trajectory & Verifier \(UI-Tars2\)](#): built and scaled MCP/tool-use trajectory data; built mock-app environments and verifiers for UI-TARS-2 agent evaluation.

[Ex2] [Tencent AI Lab](#), CA, US, Research Scientist Intern 2024

- [Blender-use Agent](#): built Blender MCP and environment, using image → code → scene → visual verifier.
- [Struct-to-Reason](#): converted visual perception into code-like structured summaries for explicit reasoning.

[Ex1] [ScholaGO](#), HK SAR, [Startup](#) Co-founder & Tech Lead 2023-2024

- [Agent-for-Education](#): built a K-12 education-agent platform; received HKSTP, HK Tech 300, and Alibaba Cloud funding (100w+ HKD total).

Selected Projects

14 first-author papers on top-tier conferences, 2800+ citations, 4000+ stars, PaperDigest 2025 [Most Influential](#) Paper. Below are recent papers regarding agents.

Technical Reports

[T4] ByteDance Seed Team (including **Chenxin Li**). **Seed2.0: Towards Intelligence Frontier for Real-World Complexity**.

Contribution: built Coco CLI harnesses, trajectories/verifiers, and AI-for-AI; improved TB2.0 by 3pp.

[T3] ByteDance Seed Team (including **Chenxin Li**). **Seed-1.8: Towards Generalized Real-World Agency**.

Contribution: code-to-chart capability, trajectory quality, and RL visual rubrics.

[T2] ByteDance Seed Team (including **Chenxin Li**). **UI-TARS-2: Advancing GUI Agent with Multi-Turn Reinforcement Learning**.

Contribution: scaled tool-use trajectory data in mock-app environments.

[T1] Tencent Hunyuan Team (including **Chenxin Li**). **PhoneBuddy Series** ([T1.1] **PhoneBuddy**, [T1.2] **PhoneHarness**, [T1.3] **PhoneWorld**, [T1.4] **PhonePrivacy**, [T1.5] **PhoneSafety**).

Contribution: built phone-use agents, mixed-action harnesses, scaling, and privacy/safety evals.

Conference Papers

[C6] **Chenxin Li** as First author & Project Lead; **Claw-Eval (Live): A Live Agent Benchmark for Evolving Real-World Workflows**, arXiv'26.

[C5] **Chenxin Li** as Co-first author; **GameCraft-Bench: Can Agents Build Playable Games End-to-End in a Real Game Engine?**, arXiv'26.

[C4] **Chenxin Li** as Co-first author; **IR3D-Bench: Evaluating Vision-Language Model Scene Understanding as Agentic Inverse Rendering**, NeurIPS'25.

[C3] **Chenxin Li** as Co-first author; **ODE: Towards On-Policy Data Evolution for Visual-Native Multimodal Deep Search Agents**, arXiv'26.

[C2] **Chenxin Li** as Co-first author; **Struct-to-Reason: Enhancing Video Understanding of Vision-Language Models by Decoupling Perception and Reasoning via Structured Summary**, ICML'26.

[C1] **Chenxin Li** as Co-first author; **JarvisArt: Liberating Human Artistic Creativity via an Intelligent Photo Retouching Tool-use CLI Agent**, NeurIPS'25.

I maintain **OpenAgentLabs**, building agent workflows, highlighting **Open Codex Mobile**, **Open Codex Computer Use**, and **Agent Context Manager**. I also write **Blogs** to express insights.
